

SOEN 6481

Software Requirement Specification

Summer 2019

Deliverable 2

Eternity: Numbers

Declaration

I have read and understood the Fairness Protocol and Communal Work Protocol, and agree to abide by the policies therein, without any exception under any circumstances, whatsoever.

Problem 6. [70 Marks]

| | |
|----------------------------|---|
| Identifier | EternityNumbers_01 |
| Statement | As a user, I want my calculator to display the value of π till 15 decimal places |
| Constraint | - |
| Acceptance Criteria | <p>Given that I have to determine the value of π .</p> <ul style="list-style-type: none">• I will press the button for π .• The value for π will be displayed till 15 decimal places i.e. 3.1415... |
| Priority | Should Have |
| Estimate | Hour |

| | |
|----------------------------|--|
| Identifier | EternityNumbers_02 |
| Statement | As a user, I should be able to calculate the circumference directly by just providing the radius of the circle as this is the most frequently used calculation in my field. |
| Constraint | Number entered by the user for the radius should not be negative. |
| Acceptance Criteria | <p>Given that I have to calculate the circumference of a circle with radius 3.</p> <ul style="list-style-type: none"> • I will press the button “CRF” . • I will press 3. • The result “18.84” ($2 \times 3.14 \times r$) will be displayed. |
| Priority | Must Have |
| Estimate | Hour |

| | |
|----------------------------|---|
| Identifier | EternityNumbers_03 |
| Statement | As a user, I want my calculator to allow me to choose the precision of π so that I can use it as per my requirement. |
| Constraint | - |
| Acceptance Criteria | <p>Given that I have to calculate the area of circle and this will use π . I should be able to choose the value of π up to 2 decimal places as it will give me the required result</p> <ul style="list-style-type: none"> • While using the formula, I will press π . • I will press “C” to choose its precision. • I will choose 2 and therefore will get the value 3.14 that I can use to calculate the area. |
| Priority | Must Have |
| Estimate | Hour |

| | |
|----------------------------|---|
| Identifier | EternityNumbers_04 |
| Statement | As a user, if I enter 2 or more operators consecutively, the operation performed should be of the last operator to enhance usability. |
| Constraint | There must be at least 2 operators occurring consecutively in the expression. |
| Acceptance Criteria | Given that I have entered 3-+3. The result should be calculated as 3+3 i.e. 6. |
| Priority | Must Have |
| Estimate | 20 minutes |

| | |
|----------------------------|---|
| Identifier | EternityNumbers_05 |
| Statement | My calculator should allow edition on the operator or operand of the current computation until the result is displayed. |
| Constraint | At least one operator or operand must be entered. |
| Acceptance Criteria | <p>Given that I have to perform the following calculation “3+4* 2” .</p> <ul style="list-style-type: none"> • I will enter 3+4* 2. • Before pressing =, if I want to replace 4 with 5, I can do it. |
| Priority | Must Have |
| Estimate | Hour |

| | |
|----------------------------|---|
| Identifier | EternityNumbers_06 |
| Statement | As a user, I want my calculator to keep a record of all the computations till the calculator is turned off. |
| Constraint | There must be at least one result for the record to exist. |
| Acceptance Criteria | <ul style="list-style-type: none"> • To open the record, press “R” . • Record empty • $3+4=7$(stored in record) $5+5=10$(stored in record) $4-2=2$(stored in record) • Press “R” . • 7,10,2 • Calculator is turned off. • After turning on the calculator, press “R” . • Record empty. |
| Priority | Should Have |
| Estimate | Hour |

| | |
|----------------------------|--|
| Identifier | EternityNumbers_07 |
| Statement | As a user, I want my calculator to give me an option to delete the record of the computation that I would not need. |
| Constraint | There must be at least 1 calculation in the record. |
| Acceptance Criteria | <ul style="list-style-type: none"> • $3+4=7$(stored in record) $5+5=10$(stored in record) Press “DEL” , (10 deleted from the record). $4-2=2$(stored in record) • Press “R” . • 7,2 |
| Priority | Should Have |
| Estimate | Hour |
